

Statement of Investment Principles

Schneider Group of the Electricity Supply Pension Scheme

February 2026

1. Introduction

Under Section 35 of the Pensions Act 1995 as subsequently amended by the Pensions Act 2004 (the 'Act'), the Occupational Pension Schemes (Investment) Regulations 2005 (the '**Investment Regulations**'), the Occupational Pension Schemes (Charges and Governance) Regulations 2015 and the Occupational Pension Schemes (Investment and Disclosure) (Amendment and Modification) Regulations 2018, trustees are required to prepare a Statement of Principles governing decisions about investments for their pension funds. This Statement of Investment Principles (the '**SIP**') describes the investment policy, guidelines and procedures being pursued by the Trustees (the '**Trustees**') of the Schneider Group of the Electricity Supply Pension Scheme (the '**Scheme**'). The Trustees believe this is in compliance with the Government's voluntary code of conduct for Institutional Investment in the UK (the 'Myners Principles'). This SIP has also been drafted in a manner to reflect the requirements of the Investment Regulations.

In accordance with the Act, the Trustees confirm that, before preparing the SIP, they have obtained and considered written advice from SEI Investments (Europe) Ltd in their role as fiduciary manager of the Scheme (the '**Fiduciary Manager**'). The Trustees believe SEI to be qualified by their ability and practical experience of financial matters and to have appropriate knowledge and experience of the management of the investments of schemes such as the Scheme.

The Trustees have also consulted with Schneider Electric Limited, the Principal Employer of the Scheme (the '**Employer**'), in preparing the SIP, and the Trustees will consult the employer before revising this document further.

The Trustees will review the SIP, in consultation with the Fiduciary Manager, at least every three years, and without delay after any significant change in investment policy or the circumstances of the Scheme.

The Trustees are responsible for the investment of the Scheme's assets in the best interests of members and beneficiaries, and they exercise their powers of investment in accordance with the trust deed and rules of the Scheme and applicable law. The Trustees also arrange the administration of the Scheme. Where they are required to make an investment decision, the Trustees first receive and consider advice from the Fiduciary Manager. The Trustees believe that this ensures that they are appropriately familiar with the issues concerned.

In accordance with the Financial Services and Markets Act 2000 (FSMA), the Trustees are responsible for setting a general investment policy but have delegated the day-to-day investment decisions and investment management of the Scheme's assets to the Fiduciary Manager, who has been appointed under Section 36 of the Act. In turn, the Fiduciary Manager has delegated certain investment roles to companies within the wider SEI group ('**SEI**'). SEI and other third-party asset managers are, where appropriate, used within the Scheme's portfolio either as investment managers of pooled funds or as asset managers within multi-manager pooled funds.

The Fiduciary Management Agreement (the '**Agreement**') sets out the scope of the Fiduciary Manager's duties together with fees, investment restrictions and any other relevant matters in relation to the Scheme. The Fiduciary Manager is authorised and regulated by the Financial Conduct Authority (FCA) and provides the skill and expertise

necessary to manage the investments of the Scheme competently and in accordance with the terms of the Fiduciary Management Agreement and the principles of this SIP.

The Trustees will monitor the performance of the Fiduciary Manager against the agreed performance objectives. The Trustees will regularly review the activities of the Fiduciary Manager to ensure it continues to perform in a competent manner and has the appropriate knowledge and experience to manage the assets of the Scheme.

The Fiduciary Manager has been provided with a copy of this SIP and is aware that it is required to exercise its powers with a view to giving effect to the principles contained herein and in accordance with subsection (2) of Section 36 of the Pensions Act 1995.

2. Investment objectives

The Trustees' primary objectives in respect of the defined benefit (DB) assets are:

- To ensure that, together with contributions from the Employer, the assets can meet the Scheme's obligations to the beneficiaries of the Scheme;
- To strike an acceptable balance between the stability of funding and the long-term cost of benefit provision; and
- To achieve, over the long term, a rate of investment return sufficient to outperform the growth of the Scheme's liabilities and reach full funding on an appropriate basis while only taking the level of risk required to achieve this objective with a reasonable degree of certainty.

The Trustees have determined an appropriate rate of investment return to meet these objectives, taking into account the financial strength of the employer. The Trustees have engaged with their advisers to ensure that excessive risk will not be taken in achieving this level of investment return.

3. Choosing investments

The Trustees have delegated the management of the investment portfolio to the Fiduciary Manager. When choosing investments, the Fiduciary Manager is required to have regard to the criteria for investment set out in the Investment Regulations, the Occupational Pension Scheme (Charges and Governance) Regulations 2015, and the principles contained in this statement. Consideration will be given to the Trustees' policy to ensure there is an appropriate balance between the different kinds of investments. The assets chosen will be invested in a diverse portfolio of investments in order to reduce investment risk.

The allocation of investments is likely to change as a result of a range of factors, such as changes in market conditions and expected returns and risks. In recognition of the risks that asset allocation can imply, there are asset allocation controls in place. These are detailed in the Fiduciary Management Agreement.

4. Kinds of investments

The Fiduciary Manager may invest in a wide range of investment instruments including equities, bonds and alternative investments using pooled funds. The investments in

each fund will depend on the nature of the fund, its objective and benchmark and the risk controls which operate. If the Trustees were to impose any restrictions on types of investments, this would be reflected within the Fiduciary Management Agreement.

The Trustees have determined that derivatives or other financial instruments may be used to hedge the Scheme's liability risks (principally interest rate, inflation and longevity risks) or other risks (e.g. equity or currency risks). In addition, derivatives may be used within pooled funds for the purpose of efficient portfolio management. At any given time, a minimum level of assets of sufficient liquidity and quality will be held to ensure the Scheme is able to satisfy collateral or margin calls, which may arise as a result of the derivatives positions it holds.

5. Balance between different kinds of investments

The Trustees understand the importance of diversification and, as such, the Fiduciary Manager is required by the Trustees to ensure the assets are properly diversified. The Fiduciary Manager will keep this consideration in mind when choosing investments.

The range of, and any limitation on the proportion of, the Scheme's assets held in any asset class will be agreed between the Fiduciary Manager and the Trustees. These ranges and sets of limitations are specified in the Fiduciary Management Agreement and may be revised from time to time where considered appropriate.

6. Risks, including the ways in which risks are to be measured and managed

The Trustees recognise a number of risks involved in the investment of the assets of the Scheme and monitor these risks on a regular basis. The key identified risks are as follows:

Cashflow risk - The risk of a shortfall of liquid assets relative to the immediate liabilities. The Trustees and their advisers will manage the Scheme's cash flows taking into account the timing of future payments and may borrow over the short-term in order to minimise the probability that this occurs.

Demographic risk - Demographic factors include the uncertainty surrounding mortality projections such as future improvements in mortality experience. The Trustees will measure liabilities using mortality assumptions recommended by the Scheme Actuary.

Manager risk - The failure by the Fiduciary Manager to achieve the rate of investment return assumed by the Trustees. This issue has been considered by the Trustees on the initial appointment of the Fiduciary Manager and thereafter will be considered as part of the investment review procedures the Trustees have put in place.

Concentration risk - The risk that the performance of any single asset class or single investment that constituted a significant proportion of the assets would disproportionately influence the Trustees' ability to meet the objectives. The Trustees have delegated diversification to the Fiduciary Manager and will monitor it on a regular basis.

Credit risk - The risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Trustees limit the

risk by restricting the Scheme's exposure to investments with a high credit risk and by ensuring that credit risk is well diversified across a number of counterparties.

Market risk - The risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market prices. This includes the risk of changes in interest rates, inflation and currency rates. The Trustees will monitor the performance and ratio of assets in relation to these risks.

The Trustees will keep these risks under regular review. The management of investment risk is a function of the asset allocation and diversification strategies, and implementation of that strategy is delegated to the Fiduciary Manager.

7. Expected return on investments

A return on investments is required which, over the long term, is expected to be consistent with the Trustees' primary goal of meeting the Statutory Funding Objective and longer-term goal of buying out the Scheme. The Trustees will monitor the performance of the Scheme's assets against liabilities and the performance of the Fiduciary Manager against the agreed objectives.

8. Realisation of investments

The Trustees are aware of the importance of fund liquidity and the risk that core financial transactions are not processed promptly due to lack of liquidity in the investments. The Trustees' preference is for investments that are readily realisable, but they recognise that achieving a well-diversified portfolio may mean holding some investments that are less liquid (e.g. property).

The Trustees will ensure that the Fiduciary Manager is made aware of the cashflow requirements of the Scheme. The Fiduciary Manager will be responsible for ensuring that, in normal market conditions, sufficient assets are readily realisable to meet any disinvestments required by the Trustees to meet these cashflows.

9. Financially material considerations

The Trustees have considered how financially material considerations (including environmental, social and governance ('**ESG**') factors such as climate change) should be taken into account in the selection, retention and realisation of investments, given the time horizon of the Scheme and its members.

The Trustees have delegated asset manager selection to the Fiduciary Manager. The Fiduciary Manager will seek to appoint asset managers that have appropriate skills and processes to take account of financially material considerations in the selection, retention and realisation of investments, and it will regularly review how its asset managers are doing so in practice. The Trustees expect the Fiduciary Manager to provide updates on the latest position on ESG factors and any material decisions that have been taken by SEI or third-party asset managers as a result of considering such issues.

10. Non-financially material considerations

The Trustees have decided not to take non-financial considerations into account in the selection, retention and realisation of investments. For this purpose, 'non-financial matters' encompasses the views of the members and beneficiaries, including (but not

limited to) their ethical views, and their views in relation to social and environmental impact on the present and future quality of life of the members and beneficiaries of the Scheme. In reaching this decision, the Trustees have considered both the challenges of engaging a properly representative sample of members and the strong likelihood of a lack of consensus among those most likely to respond to such a consultation.

11. Voting, stewardship and engagement

The Scheme's investments are achieved via pooled investment funds, in which the Scheme's investments are pooled with those of other investors. The direct control of the process of engaging with the companies that issue these securities, whether for corporate governance purposes, social, ethical or environmental factors, is delegated to SEI, or in the case of a third-party pooled fund, its investment manager.

The management of the Trustees' policy in relation to the exercise of rights (including voting rights) and other engagement activities in respect of an investment is as follows:

- Voting decisions on stocks are delegated to the investment manager of the pooled fund. Where this is SEI, SEI has pooled the holdings in their funds with other investors and employed a specialist ESG provider for voting and engagement services. The Fiduciary Manager was a signatory to the 2010 UK Stewardship Code issued by the Financial Reporting Council and is now in the process of becoming a signatory to the 2020 Stewardship Code. The Fiduciary Manager will report on voting and engagement activity to the Trustees on a periodic basis together with its adherence to the UK Stewardship Code.
- SEI, or the investment manager of a third-party pooled fund, has full discretion for undertaking engagement activities in respect of the investments:
 - (a) with relevant persons (which term includes (but is not limited to) an issuer of debt or equity, an investment manager, another stakeholder or another holder of debt or equity);
 - (b) about relevant matters including (but not limited to) matters concerning an issuer of debt or equity, including their performance, strategy, capital structure, management of actual or potential conflicts of interest, risks, social and environmental impact and corporate governance. Under the Investment Regulations, the Trustees must document the methods by which and the circumstances under which the Trustees monitor and engage with the relevant persons about relevant matters. The Trustees have delegated the responsibility for such monitoring and engagement to SEI.

The Trustees will consider whether the approach taken was appropriate or whether an alternative approach is necessary.

Additional voluntary contributions (AVCs)

There are currently no AVC investments.

12. Asset manager arrangements

Incentivising and monitoring managers to align with Trustees' investment strategy

The Fiduciary Manager is incentivised to align its investment strategies with the Trustees' policies mentioned in this SIP through the terms set out in the Fiduciary Management Agreement and through the Trustees setting investment objectives which are reviewed annually. The Trustees will monitor performance quarterly and assess performance against these investment objectives annually. The Trustees have also appointed an independent adviser to assist in assessing the Fiduciary Manager's performance. Such review will also include how well the Fiduciary Manager is aligned with the SIP, including alignment in terms of ESG factors and the quality of service provided.

If the Fiduciary Manager does not meet its objectives, it may ultimately result in the termination of its mandate. The agreement with SEI allows either of the Group Trustee or the Scheme Trustee to terminate the Agreement at any time by written notice to the other parties, with effect on such date as the notice may specify.

SEI engages third-party asset managers either through the use of third-party pooled funds or through the appointment of asset managers within multi-manager pooled funds.

SEI will monitor the asset managers' performance on an ongoing basis against the particular investment strategy and objectives agreed with that manager. Where an asset manager is not performing or acting in a manner SEI feels is appropriate it may ultimately result in the termination of their mandate.

The fees paid to the Fiduciary Manager, and the possibility of their mandate being terminated, ensure they are incentivised to provide a high-quality service that meets the stated objectives, guidelines and restrictions of the Scheme. The Fiduciary Manager is responsible for fee arrangements with asset managers, the costs of which are borne directly by the Scheme.

Medium- to long-term and non-financial performance

Performance in the medium to long term can be improved where asset managers (i) make decisions based on assessments about medium- to long-term financial and non-financial performance of an issuer of debt or equity; and (ii) engage with issuers of debt or equity. The Trustees have delegated this to SEI and will monitor performance against this.

Monitoring portfolio turnover and costs

The Trustees have delegated the monitoring of the costs incurred by asset managers in the buying, selling, lending or borrowing of investments to the Fiduciary Manager.

The Trustees recognise that portfolio turnover (being the frequency with which the assets are expected to be bought/sold) and associated transaction costs are a necessary part of investment management and that the impact of portfolio turnover costs is reflected in performance figures provided by the Fiduciary Manager. However, the Fiduciary Manager will incorporate portfolio turnover and resulting transaction costs in its advice on the Scheme's investment mandates. When the Trustees agree a particular strategy and investment mandate, this will then set an expected level of turnover and transaction costs. The Trustees review and monitor the actual level of the costs and turnover against this expected level.

Duration of asset manager agreements

The agreement with the Fiduciary Manager has an indefinite term but can be terminated by either the Group Trustee or the Scheme Trustee at any time by written notice to the other parties, with effect on such date as the notice may specify. The Scheme does not have any direct agreements with third-party managers used by the Scheme.

13. Declaration

The Trustees confirm that this SIP reflects the investment strategy they have implemented for the Scheme. The Trustees acknowledge that it is their responsibility, with guidance from SEI, the Fiduciary Manager, to ensure the assets of the Scheme are invested in accordance with these principles.

For and on behalf of the Trustees of the Schneider Group of the Electricity Supply Pension Scheme.
